Lynchburg Virginian.

A Virginia farmer, having suffered are erely from the depredations of dogs upon his sheep fold, built around a number of abeep that dogs had killed an enclosure of rails twelve feet high and ten feet square at the ground, the sides of the trap sloping inward until an opening was left about five test square. Any dog could easily climb such a sloping fence and enter the pen, but not even a greyhound could jump out of it. In three nights the farmer captured forty-six dogs, including fifteen or twenty that had never been seen before in that neighborhood. This after there had been a public slaughter of all dogs suspected of speep stealing, save one, whose master could not be convinced of his guilt. The trap was built for his especial benefit, and it saught him the first night.

Wells Wouldn't Wed.

A heavy rain storm prevailed at the time appointed for Frank Wells' wed-ding, at Crawfordville, Ind., and it may be that the dampness quenched his matrimonial ardor, for he borrow-ed \$6 and an umbrella from the bride, walked off hurriedly toward the rail-road station, and has not since been seen in the town.

THE SUN.

1882.

THE SUN for 1882 will make its fifteenth annual revolution under the present management, chining, as always, for all, big and little, mean and gracious, contented and unhappy. Republican and Democratic, deprayed and virtuous, intelligent and obtuse. The Sun's light is for mankind and womaukind of every cort; but its genial warmth is for the good, while it pours hot discomfort on the blistering backs of the persistently wicked.

on the blistering backs of the persistently wicked.

The Sun of 1848 was a newspaper of a new kind. It discarded many of the forms, and a multitude of the superfluous words and phrases of ancient Journalism. It undertook to report in a fresh, succinct, unconventional way, all the news of the world, omitting no event of human interest, and commenting upon affairs with the fearlessness of absolute independence. The success of this experievent of human interest, and commenting upon affairs with the fearlessness of absolute independence. The success of this experiment was the encores of The Sux. It effected a permanent change in the style of American newspapers. Every important newspaper established in this country in the dozen years past has been modelied after The Sux. Every important journal already existing has been medified and bettered by the force of The Sux's example.

The Sux's example.

The Sux's example.

The Sux of 1885 will be the same outspoken, truth-telling and interesting newspaper.

By a liberal use of the means which an abundant prosperity affords, we shall make it better than ever before.

We shall print all the news, putting it into readable shape, and measuring its importance, not by the traditional yardstick, but by its real interest to the people. Distance from Printing House Square is not the first consideration with The Sux. Whenever anything happens worth reporting we get the partieners, whether it happens in Receiving Sec.

appens worth reporting we get the pa ars, whether it happens in Brooklyn or lars, whether it happens in Brooklyn or Sokhara.

In-politics we have decided opinions; and are accustomed to express them in language that can be understood. We say what we think about men and events. That habit is the only secret of Thu Sun's political course. The Wenkly Sun gathers into eight pages the best matter of the seven dairy issues. An Arricultural Department of unequaled meritful market reports, and a liberal proportion of literary, scientific and domestic intelligence complete the Wenkly Sun, and make it the best newspaper for the larmer's household that was ever printed.

Who does not know and read and like The Senday Sun, each number of which is a Golconda of interesting literature, with the best poetry of the day, prose every line worth reading, news, humor—matter enough to fill a good-sized book, and infinitely more varied and entertaining than any book, big or little? If our idea of what a newspaper should be pleases you, send for The Sun.

Our terms are as follows:

For the daily Sun, a four-page sheet of twenty eight columns, the price by mail, post-paid, is 55 cents a month, or \$6.50 a year; or, including the Sanday paper, an eight-usee sheet of fifty-six columns, the price is 65 cents per month, or \$7.70 a year, postage paid.

The price of the WERELY SUN, eight pages
fifty-six columns, is \$1 a year, postage paid

\$915. AN OUNCE OF PREVENTION.

The terrible disaster at Vienna, by which one thousand people lost their lives through the neglect of others, has called aftention to the condition of public halls of assembly all over the continent. From Madrid, Paris, London and other centres of population come warnings that the people are not to be placed in peril of their lives through the economy or avarice of those whom they are compelled to trust. Special rules and laws have already been passed for the security of life and to prevent the recurrence of

such criminal neglect. From America we hear little or nothing about the matter. What does this mean?

Either that Americans are more hopeful and more dependent on miracles, or more careless of the obviously necessary precautions.

BELL TONGUE SYRUP, A N ACCIDENTAL DISCOVERY OF An Inestimable Benefit to

Mankind. UNCLE BEN JO'S

CREAT SOUTH AMERICAN PANACEA UNGLE BEN JO was born in Boston in Sco. Being a botanist, he effected many won-leafn cones with roots and herba. In 1844 he went to South America to study botany, and white there accidentally made his great discovery. The natives of this country were quite familiar with it, and had always supposed it to be a poisonous herb, which they used of the sole purpose of keeping snakes away from their tents or houses. This they did by aging it in a circle about the same at a proposed is the natives, considered a very obnoxious and poisonous one, and when green and fresh three words a very distanteful and repulsive dor. The herb grows about two feet high, and about eight inches jof the top part or its alk is leafless, and this part lope over and same downward perpendicularly, and from as curved neck to its end it increases in size, and on the end of the same is a large, burty-ooking ball, which stalk and ball, in this sanging position, looks predisely like the ongue of a bell. Hence, lucke Ju samed it he Bell Tongue Plant. In South America his herb is only found in the extreme inter-or of the country, and the natives there call the Zar Nero." It is a wonderful cura of cidney and iver dissess, and on diver dissess, and on diver dissess, and on diver dissess, and on diver dissess, as only peoples, securality and interdissess. Hence, here, here is the country and the natives there call the and in the country and the natives there call the country and
